

SWING UP TYPE "U"

UG120-“U” Swing Up Grab Bar: Bar is fabricated of type 304 #18 gauge stainless steel with a #4 satin finish and 1¼” outside diameter. Mounting plate is type 304 #11 gauge stainless steel with 6 exposed mounting points. Bar extends out 29” from wall surface and can be lowered or raised in increments of 1 degree at a time. Underneath the post is a clutch that adjusts tension on the bar. This tension clutch controls the force required to move the bar up and down. When adjusted properly, the bar will stay in the up-right position without the need of any clips to hold the bar.

Options: “X”: Peened Surface (Non Slip)

UG120-M: Same as UG120-U with optional toilet tissue holder.

Mounting Recommendations: A & J recommends when ever possible to have concealed in-wall mounting to add to the integrity of the bar. BP30 mounting kit is recommended for the swing up bar. This consists of three #11 gauge stainless steel plates that secure the mounting plate to the framing.

Grab Bar Mounting Kits

*One MK type mounting kit is required per flange.

TYPE SURFACE	CONC. SNAP ON	CONC. SET SCREW	EXPOSED
WOOD	MK-2	MK-20	MK-120
DRYWALL	MK-3	MK-30	MK-130
MASONRY-1	MK-4	MK-40	MK-140
MASONRY-2	MK-5	MK-50	MK-150
PARTITION-1	MK-6	MK-60	MK-160
PARTITION-2	MK-7	MK-70	MK-170

MASONRY-1: In Wall
 MASONRY-2: Thru Wall
 PARTITION-1: One Sided
 PARTITION-2: Back To Back
BP10: Concealed in wall mounting plate. One required per side of grab bar.
 (Example: Style G: Requires 2 plates)
